Village of Ballston Spa to do tree inventory

The Village of Ballston Spa will begin a tree inventory on Tuesday, September 14, 2021 to determine the type and health of the public street and park trees located in the village. The village received a \$26,555 Urban Community Forestry Grant from the New York State Department of Environmental Conservation (DEC) to conduct a Tree Inventory and Management Plan and has selected Davey Resources Group to conduct the inventory. Davey Resource Group will look at maintained trees, planting sites and stumps. Certified arborists will walk from tree to tree and inspect the trees from the ground. The arborists will be here for two to three weeks.
